# PROJECT SHEET

## Cattle Creek to Frances Creek Upgrade

### Project Overview

SGPS are currently engaged by the Department of Transport & Main Roads to supply a Structural Inspector to carry out inspection works along a 5.8km section of the Bruce Highway. The role includes the inspection of two new bridges along with the numerous retaining walls, concrete barriers, drainage structures and gantries.

**CLIENT** Department of Transport and Main Roads

**CLIENT CONTACT** Terry McCrystal

**LOCATION** Ingham QLD

**CONTRACT TYPE** -

**VALUE** \$118.9 Million

**ROLES PROVIDED** Structural Inspector

**COMPLETION DATE** July 2018

**DURATION** 15 Months

### Key Project Management Tasks

- Ensure that the works onsite comply with the requirements of the Contract with regular onsite inspection of the Works
- Authorised to release relevant Witness Points and Hold Points related to the Bridge Structures as nominated in the applicable Specification
- Promptly raise any non-compliance or departure from the Contract and report to the relevant Engineer for resolution
- Promptly raise any issues which pertain to safety and environment and which are of a serious or hazardous nature
- Foster a good working relationship with the Contractor and assist the Contractor to perform his/her responsibilities under the Contract to ensure a best for project outcome is achieved
- Be familiar with the Contract (including drawings, specifications etc)
- Keep accurate records of site activities undertaken by the Contractor daily;
- Check and verify for completeness/accuracy the lot documentation submitted by the Contractor to enable certification for payment by the relevant Engineer when the relevant payment claim is received.

### Project Outcomes

- Early Coordination with contractor of site works in low lying, flood prone areas;
- Worked with contractor to develop work method statements that enabled work to be accelerated while quality was maintained;
- Project on budget and ahead of time.
